01

THE CHALLENGE

A solid brand that had simply stopped growing.

The client had reached a plateau. Revenue was stagnant despite a strong product catalogue and a loyal organic following. There was no strategic guidance on performance marketing, tracking visibility was limited, and campaigns were running without a clear framework.

Beyond the ads themselves, there was no deep understanding of the industry's seasonality, of competitor moves, or of how to properly leverage the brand's own engaged community across social channels.

Full-scope engagement, from tracking to TikTok.

Foundations

GA4 + Google Merchant Center setup, restructured Google Ads (PMax, Search, Brand) and Meta campaigns (CBO, Remarketing, Advantage+) from the ground up.

Seasonality & strategy

Monthly planning aligned to beauty-industry peaks, ongoing competitor analysis, and product seasonality built on three years of category immersion.

Content & community

Creative direction across TikTok, IG Lives and YouTube, plus coordinated MUA collaborations for organic amplification of the brand.
