01

THE CHALLENGE

A loved brand losing ground, fast.

The bookstore entered 2025 under significant pressure. Across the first five months of the year, revenue was running -20% versus the same period in 2024 — a sustained, accelerating decline despite strong brand equity and an engaged customer base.

When we took over in June 2025, the immediate priority wasn't growth. It was to stop the bleeding. The strategic question was how to stabilise performance in the first months of intervention, then engineer a measured return to year-on-year growth.

Rebuild the entire paid-media architecture, channel by channel.

Google: full restructure

Complete campaign redesign — reallocated budget, revised bidding strategies, and deployed custom scripts to surface inefficiencies. Q4 result: 186K clicks, 5.23% CTR, 5,464 conversions.

Meta: hybrid Performance + Awareness

Rebuilt from a clean base with no historical data — a hybrid strategy balancing brand awareness with direct performance. Q4 result: 4.40M impressions, 780K reach, 1,075 purchases.

Channel expansion

Added TikTok, YouTube and email marketing into a coherent multi-channel mix — turning the brand's reach from constrained to category-relevant.
