01

THE CHALLENGE

Genuine brand strength, no strategic infrastructure.

Before February 2025, Aura's ad budget was managed by other advertisers spending without accountability. High cost, low return — money leaving without coming back.

The brand itself had genuine equity: a premium eco-lifestyle positioning with real product strength. But the strategic infrastructure to turn that equity into scalable, profitable performance was missing.

A complete commercial strategy, not just ads.

Performance reset

Google Ads (PMax, Search Branded, Demand Gen) + Meta (Shopping, Conversions, Remarketing, ATC) — restructured from scratch with efficiency, not scale, as the primary KPI.

Product & promotions

Hero product selection, seasonal drops, product bundling, and precisely timed promotional windows (Flash Sales, Black Friday, themed offers) designed to drive conversion without devaluing the brand.

Newsletter, content & advisory

Targeted newsletter campaigns, a structured content calendar, and hands-on business consulting on pricing, range and supplier strategy.
