

€3.99M in revenue. €15K in ad spend.

A four-year, deliberately conservative partnership in a high-intent category — where discipline, not scale, was the entire strategy.

01

THE CHALLENGE

Maximum return inside a fixed, immovable budget.

A technology products e-shop — a category that structurally allows for exceptionally high ROAS, thanks to high average order values and strong purchase intent. A stable, mature account under our management from 2022 through early 2026.

The constraint was the brief itself. The client ran a deliberately conservative budget, with no appetite for aggressive scaling and no push for expansion. Our job was to extract every possible euro of value from a capped spend.

02

THE SOLUTION

Hands-off trust. Hands-on optimisation.

Lean Google structure

Performance Max as the primary driver, paired with tight Branded Search defence. No experimentation budget, no vanity spend — every campaign tied to a hard ROAS floor.

Meta for incremental value

Conversions, Advantage+ and Remarketing at controlled spend (€7,788), delivering €566K conv. value at 72.8x ROAS — a strong supporting line, not a primary channel.

Quiet, consistent management

Minimal client meetings, minimal noise. The work was in the daily optimisation — and the result was a +30.59% YoY revenue growth that the budget itself could not have delivered.
