01

THE CHALLENGE

A solid e-shop without a clear digital strategy.

When the partnership began in 2023, the motorcycle equipment e-shop had a strong product range and category authority, but no structured performance marketing approach. Campaigns ran without supplemental feeds, scripts, or a clear scaling plan.

Trust had to be built first. The client's Marketing Manager was deeply involved, which meant every decision needed to be defensible — and every euro of incremental spend had to be tied directly to measurable revenue growth.

02

THE SOLUTION

Earn trust, then push the budget where it works.

Technical depth

Google Ads Scripts for automation, Supplemental Feeds for richer product data, and structured PMax + Search campaigns built around the highest-margin categories.

Phased budget growth

Year-on-year, Google spend grew +22% — but only after we proved each increment. Revenue from Google followed with +55% growth in 2025.

Meta as support

Meta played a secondary role: prospecting and remarketing at controlled spend (€8,165 in 2025) — kept lean while Google did the heavy lifting.
